

## HVLP low pressure spraying system

The Capspray 8500 is a powerful and versatile turbine unit, spraying a wide range of coatings. Sprays stain up to finish quality latex. Rugged, portable and dependable as you would expect.

## Key benefits:

- » The number one selling HVLP in the industry continues to offer the highest level of performance and control.
- » Proven technology - you finish every job quickly and profitable.
- » The latest engineering technology ensures ease of use and dependability, keeping contractors on the job.

## Specifications

|                                      |                                     |
|--------------------------------------|-------------------------------------|
| Voltage                              | 220 - 240 V, 50/60 Hz               |
| Max. current consumption             | 7.5 A                               |
| Acceptance capacity                  | 1450 W                              |
| Max. air ram pressure                | 0.55 bar                            |
| RPM                                  | 21 000 RPM                          |
| Weight                               | 15 kg                               |
| Mains cable                          | 3 m                                 |
| Container capacity                   | 1 l                                 |
| Nozzle set                           | No. 3 (1.3 mm)                      |
| Max. permissible coating temperature | 43° C                               |
| Typical coating flow rate            | 0.35 l/min                          |
| Gun included                         | Maxum II HVLP Gun with 9 m Air Hose |
| Partnumber                           | 0524044                             |
